

## Ed & Pat Walters' Additions & Improvements

"Pat and I did and as I do now, always enjoy the very positive expressions and comments by first-time visitors to our home following your re-model. Not a day goes by that I do not think to myself how much I enjoy my home."

Ed Walters, 1/2/15

Pat suffered multiple sclerosis and the house needed to be remodeled to make it more accessible, useful and enjoyable. In addition to reorganizing its floor plan and updating its appliances and finishes, an elevator was added and the kitchen, dining and living spaces were enlarged and made wheel chair accessible. One of the more valued improvements was the development of an entry garden view terrace that welcomed guests and invited Pat and Ed to get outside, garden and entertain more easily.
