

LAKE WASHINGTON RESIDENCE & DOCK

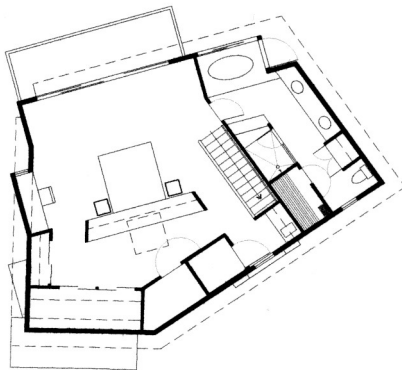

"THE PUZZLER" Seattle, WA

MAIN

MID

UPPER

The design for "The Puzzler" seems unusually large for such a small, three story 2,463 SF house and dock on such an extremely small (1,823 SF land area) and irregularly shaped Seattle lot on Lake Washington. It includes an entry, powder room, kitchen with 27.5 LF of counter space, living, dining and garden terrace just above the water, two minor bedrooms with views of the lake, a study that shares a view terrace with the family room, a laundry, minor bath with ample shower, generous master bedroom suite with view terrace, spacious walk-in closet, view bath and sauna, an elevator and three parking spaces off its very narrow street. All necessary permits for the house and dock were approved before the project was terminated.
